- ECA Team

Windows (QT & Desktop wallets)

First, turn off your wallet

1- Make a copy of your **wallet.dat**

a- Press the windows key + R

b- Type : **%appdata%\Electra** and then click on OK

c- Electra folder is open, copy and paste the file **Wallet.dat** in a safety location, best in other hard drive, usb key, ect...

d- Delete everything in this folder **EXCEPT** **Electra.conf** and **Wallet.dat**

2- Uninstall your current wallet (**DON'T DELETE ELECTRA FOLDER ABOVE**)

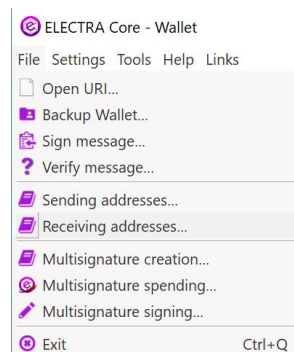

3- Download and install the last version:

<https://www.electraproject.org/wallets>

4- Run the wallet. If the sync seems stuck, use our Bootstrap:

<https://github.com/Electra-project/Electra-Bootstrap>

If you were using the Desktop wallet, your different accounts/addresses are listed in: File => Receiving addresses
